RELEVANT EXPERIENCE

GENERAL ASSEMBLY, New York, NY 4/2014 - 7/2014
• Performed Test Driven Development using Rspec and Jasmine.
• Built complex apps using various front end and backend technologies.
• Built **Doctor Scheduler** app hosted on heroku (http://peaceful-coast-3148.herokuapp.com/); makes extensive use of the Bootstrap front end framework; is built with Ruby on Rails, and makes use of the Google search API.
• **JobBoard** app, a pairing exercise with two other students, is hosted on heroku (http://wdi-job-board.herokuapp.com/). My job consisted of writing Rspec tests, making Bootstrap enhancements, and writing Ajax code to make editing-in-place possible on 'job cards'.
• **HealthTracker** two-model app (http://health-tracker.herokuapp.com/) makes use of Bootstrap, the Rails platform, and the Highcharts Javascript visualization library.
